

Communication Protocol Regarding Reported Violations from University Housing

In the event that a student is found to be in violation of Cal Poly Residential Life (Housing) Policies and it can be concluded that the student's violation may have a direct connection to a fraternity or sorority related activity; the Fraternity & Sorority Life staff will initiate the following protocol:

- Staff will maintain full confidentiality of any names that are reported by Housing staff so as to protect the student's identity
- Staff may request to meet with the student to gain better understanding of the situation at hand
- Staff will follow up with the identified organization(s) to determine if there is a viable nexus between the involved parties
- Staff will decide on the appropriate action necessary for the organization in question

In collaboration with Residential Life staff, the first priority will be to maintain the confidentiality of the student in question so as to not ensue retaliation or external pressure on the individual. The second priority of the Fraternity & Sorority Life staff will be to determine if there is a viable nexus that connects the organization in question to any violation of Cal Poly Fraternity & Sorority Life policies.
